ORDNANCE TRAINING DIVISION

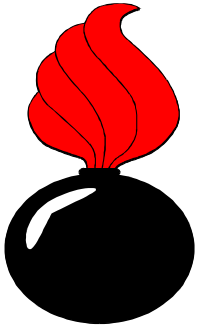
Waiver Process



Waiver Process

- Waivers emailed to CASCOM TD by unit representative/Title XI.
- Assigns a tracking number, enters it in log and forwards waiver to SME.
- Waivers that need additional information are returned to the unit.
- SME reviews waiver, makes recommendation.
- Waiver approval/disapproval, changes status of waiver in log, and sends for signature.
    - Waivers that benefit multiple TASS-BN and RTS-Ms have blanket waivers submitted
- Director reviews waiver and signs approval/disapproval-waiver is returned.
- Status is changed in waiver log and the original document is filed at TD.
- Waiver is returned electronically to the unit with "original signed"

*Waiver information is being captured for inclusion when appropriate into

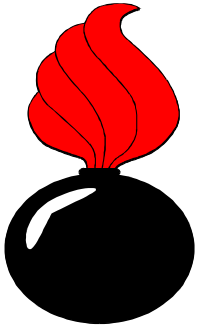
Virtual FTX/STX



Virtual FTX/STX

ISSUES

- FTX is not being conducted at any RTSM, therefore none of the tasks specified in the Phase I Course Management Plan (CMP) are being trained.

- FTX is mandated by the Sergeant's Major Academy and TRADOC.

- The VSTX was developed for the Transportation Corps, and meets some, but not all of the Common Task List requirements for the FTX/STX training.

OPTIONS

- Implement the Transportation School Developed virtual simulated training exercise (VSTX) (Copies of the VSTX were sent to all RTSMs for review)

- Continue to grant waivers for the FTX

NOTE: The POI states that an FTX or STX can be used, so a waiver Is not necessary if the VSTX is used.

ALTERNATIVE LONG-RANGE COA

- Marines have a COS combat simulator based upon “First Pe Gaming”
- using either a desktop or laptop computer.
  - Vehicle can be driven
  - Weapons can fire
  - Soldiers can be injured or killed
- Simulator can be programmed to meet our needs but will require extensive funding.
- Simulator can include maintenance operations in a combat environment to include.
  - Convoy operations
  - Route selection
  - Ambushes
  - Call for fire
  - Call for medivac
  - Reacting to a chemical attack
  - Perimeter defense
  - Recovery of a disabled vehicle
- Computer can be networked for use by a team directed by a leader. Decisions made by the leader will effect the outcome of each mission.
- A prototype can be developed by the contractor using a scenario we develop virtually at no cost but will not include army equipment such as the FMTV or HEMTT wrecker
